**LETTER OF DEFICIENCY  
WET 2003-41**

November 14, 2003

James & Sus Carrick  
1593 Washington Rd  
Goshen, NH 03752

RE: DES Wetlands File #2003-01187 Route 31, Goshen

Dear James & Sus Carrick:

On August 15, 2003, personnel from the Department of Environmental Services ("DES") conducted an inspection of the above referenced property, more specifically referenced on Town of Goshen Tax Map 407 as Lot 8 (the "Property"). The purpose of the inspection was to determine compliance with RSA 482-A and NH Code of Admin. Rules Wt 100-700.

During the inspection the following deficiencies were documented

Approximately 1,600 square feet of jurisdictional wetlands had been filled for the construction of a garage on the aforementioned Property without a permit from DES.

- 2 An approximately 8-inch x 70-foot culvert had been installed within the filled jurisdictional wetland.

In response, you are requested to take the following actions

Within 60 days of receipt of this Letter of Deficiency, submit a restoration plan to DES for review and approval. Have the restoration plan prepared by a certified wetland scientist, and include provisions for removing the culvert and associated fill on the Property. Submit the following with the restoration plan:

- a. A plan with dimensions, drawn to scale, showing:
  1. Existing conditions, with wetland boundaries; and
  2. Proposed conditions after reestablishing the jurisdictional areas;
- b. A detailed description of the proposed means of erosion control (silt fence, hay bales, etc) and stabilization of the restoration area;
- c. A detailed description of the proposed planting plan for the stabilization and revegetation of the restoration area and control of invasive species such as purple loosestrife (*Lythrum salicaria*) and common reed (*Phragmites australis*);
- d. A description of the proposed construction sequence and methods for accomplishing restoration and anticipated restoration compliance date.
- e. A description of the method of documenting at least 75% survival of all vegetation planted during the restoration project. This should include at a minimum monitoring progress reports for

one successive growing seasons following completion of the restoration project.

2. Retain a qualified wetland scientist to supervise the implementation of the restoration plan and to submit the restoration progress reports.
3. Implement the restoration plan only after receiving written approval and as conditioned by DES

RSA 482-A, the New Hampshire Wetlands law, was enacted to protect and preserve wetlands and surface waters from unregulated despoliation. Prior to dredging, filling, or construction in and adjacent to wetlands or surface waters, an individual is required to obtain a permit. If work is done without a permit, this is considered a violation of RSA 482-A. Failure to respond to this Letter of Deficiency in a timely and complete manner may be construed as noncompliance by the receiving party.

DES personnel may conduct another inspection at a later date to determine whether you have come into and are maintaining full compliance with the applicable statute and rules.

Issuance of this letter shall not preclude further enforcement by DES. Failure to comply with RSA 482-A will result in enforcement by DES, including but not limited to the issuance of fines, administrative orders, or referral to the New Hampshire Office of the Attorney General for prosecution of civil or criminal penalties. If an order is issued to you, it may also be recorded with the Registry of Deeds as an encumbrance against your property.

All documents submitted in response to this Letter of Deficiency should be addressed as follows:

William A. Thomas, Compliance Specialist  
Wetlands Bureau  
Department of Environmental Services  
29 Hazen Drive  
PO Box 95  
Concord, NH 03302-0095

Should you have any questions regarding this letter, or wish to arrange a meeting, please contact William A. Thomas at (603) 271-4066 or by e-mail at [wthomas@des.state.nh.us](mailto:wthomas@des.state.nh.us).

Sincerely,
